Frontend Developer

I am a person whose excitement is fresh, my energy is high, I am aware of my responsibilities and fulfills them properly, who also likes to add things from himself to his environment, and can adapt to different technologies in a short time. I try to improve myself during the day. This is feeling to me better

Specialties: C++, JavaScript, ReactJS, Python

Technologies: HTML5, CSS3, Bootstrap, Reactstrap, MySQL

Languages: English: A2

Programming resources used for self-learning: React Docs, Open Source React Packages on Github, Stack Overflow, Colt Steele, Patika.dev, Mosh Hamedani, Hakan Yalcinkaya, Gokhan Kandemir

Achievements: Patika.dev Front-End Challenge #1 - I have successfully completed the training

Interests: I'm interested in music. I play the guitar and sing.

EDUCATION AND COURSES

Computer Engineering (Bachelor's Degree), Beykent Üniversitesi	2019 - Present
Computer Engineering (Bachelor's degree), Atatürk Üniversitesi	2016 - 2019
Patika.dev Frontend Web Development Patikası	2021
Turkcell Web Programlama 301 - Javascript Link	2020
Turkcell Web Programlama 201 - CSS Link	2020

PROJECTS

My React Blog (Code) (Live)	2021
Technologies: JavaScript, Html, Css, React	
Features: I designed my own website with ReactJS.	
Movie Search (Code/Live)	2021
Technologies: JavaScript, Html, Css, React	
Features: I developed a React application that can search for movies and add movies to favorites using the OMDb API.	
Todo App (Code/Live)	2021
Technologies: JavaScript, Html, Css, React	
Features: In the process of making daily and weekly plans and following them, some use only paper and pencil, and some use frequently preferred to-do list applications. I developed a simple to-do list application with ReactJS.
